

IN THE SPECIFICATION:

Page 32, delete "made larger" at the end of line 1 and beginning of line 2, and insert ~~changed~~.

Page 32, line 3, delete "larger" and insert --changed--.

Page 32, line 4, after "position." insert, --That one case is where the angle between adjustable radial projection 200 and upward projection 94 of toggle device 64 will not permit the desired counterclockwise rotation of slot 118 and shaft 116 to effect the desired reduced angular setting.--

As discussed at the interview and acknowledged by the Examiner, this amendment to the specification does not introduce any new matter. It just sets forth the operation of the disclosed structure consistent with the description set forth from Page 31, line 20 - page 33, line 10.

Applicant will present claim amendments and new claims, and applicant believes that all claims should be allowable and that this case should be ready for issuance.

Rewrite Claim 27 as follows:

<sup>32</sup>  
Claim ~~27~~. (Twice amended) An oscillating transmission having an output gear, a gear cage with two drive gears, a first drive gear and a second drive gear for alternate driving engagement with said output gear to oscillate it, means mounting said gear cage for movement, toggle means for alternately moving said gear cage in one direction to drivingly engage said first drive gear with said output gear or in the other direction to drivingly engage said second drive gear with said output gear, [including] first biasing means for biasing said toggle means and said gear cage in one direction or the other direction, and second biasing means for biasing said gear cage in at least one direction to place and maintain said first drive gear in driving engagement with said output gear when said first means for biasing has been removed.

Rewrite claim 43 as follows:
